TSCM Inspection

Services Performed During the TSCM Inspection:

- 1.) Exterior walk around of the facility to determine sensitive areas, intercept locations, and probable listening posts.
- 2.) Inspection of Common wireless device inspection and analysis consisting of frequency range 9 kHz to 3 GHz to be performed in all areas of the facility. Other frequencies and RF energy may be detected by radiation detection.
- 3.) Inspection of all electrical, telecommunication, and HVAC carrier lines, outages will be experienced by end users.
- 4.) Evaluation of physical security of the facility to include alarms, locks, CCTV, and other security related activities.
- 5.) Inspection of all electronic devices to include entertainment, communication, and computers.
- 6.) Inspection of electrical outlet and switches, covers will be removed and replaced.
- 7.) Inspection of HVAC controls.
- 8.) Inspection of alarm devices and panel.
- 9.) Inspection of all furnishings.
- 10.) Inspections of drop ceiling, ceiling access panels, and/or attic areas easily accessible.
- 11.) Inspection of lighting fixtures.

In the event a device is found:

- 1.) Client will be notified verbally.
- 2.) Direction from the client will be followed to include law enforcement notification, removal, or deactivation.
